

Disclaimers for International Society for Tractography

General Communication Disclaimer

The International Society for Tractography (IST) provides information for educational and scientific purposes only. The content presented by the IST, including but not limited to research findings, methodologies, and discussions, should not be construed as medical advice. Always consult with qualified healthcare professionals for any medical concerns or decisions.

Webinar/Event Disclaimer

This [webinar/event] is organized by the International Society for Tractography (IST) for scientific and educational purposes. The information presented here, including any discussions on MRI methods, medical imaging, neuroscience, or neurosurgery, is intended for research and academic purposes only. It does not constitute medical advice, diagnosis, or treatment recommendations. Viewers/attendees should not rely on this information as a substitute for professional medical consultation.

Extended Liability Disclaimer

The International Society for Tractography (IST) strives to ensure the accuracy and reliability of the information it presents. However, IST, its members, presenters, and affiliates make no representations or warranties of any kind, express or implied, about the completeness, accuracy, reliability, suitability, or availability of the information, products, services, or related graphics contained in our communications or events for any purpose.

The information provided by IST is for educational and research purposes only and does not constitute medical advice, diagnosis, or treatment recommendations. IST explicitly states that no clinical advice is given through its communications, presentations, or materials. Individuals should not use this information as a substitute for professional medical consultation or treatment.

Any reliance you place on such information is therefore strictly at your own risk. In no event will IST be liable for any loss or damage including without limitation, indirect or consequential loss or damage, or any loss or damage whatsoever arising from loss of data or profits arising out of, or in connection with, the use of information presented by IST. This includes any adverse outcomes or complications that may arise from clinical decisions made based on IST-presented information without proper medical consultation.

Research Application Notice

The tractography methods, neuroimaging techniques, and research findings discussed by the International Society for Tractography are primarily intended for research applications. While these may have potential clinical implications, their direct application to patient care should only be undertaken within approved clinical trials or under the guidance of qualified medical professionals in accordance with local regulatory requirements.

Any form of bullying, discrimination, harassment, sexual or otherwise, is unacceptable and will not be tolerated.
